Hat Heads

AS WELL AS keeping you warm, hats draw attention to the face and create a mysterious allure. The old saying goes, "If you want to get ahead and get noticed, then get a hat." It's important to wear a hat that's suitable for your face shape and size. Wearing a hat that's too big or too small for you can be unflattering. The right hat should complement your facial features and be in balance with your proportions. Really, a hat is the perfect accessory, especially if you're having a bad hair day—no one will ever know. —*Andrea Maria Sims*
